WORK EXPERIENCE

eSpace

Feb 2023 - Present

DevOps Engineer

- Managed Kubernetes clusters (AKS & on-prem), deployed microservices, and ensured high availability across multiple environments for multiple clients.
- Worked with dev teams via Jira to fix deployments, pipelines, and integration, enhancing system stability.
- Optimized Azure cloud infrastructure, cut costs, improved resource use and applied best practices.
- Migrated legacy apps to Kubernetes clusters via GitOps and archived the old servers securely.
- Implemented monitoring with Prometheus, Grafana & Loki for performance tracking, and issue detection.
- Led environment setup for an AI startup, integrating SIEM tools, Kafka, Kafka Connect, and Elasticsearch for seamless data flow.
